Examiners Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Van Gieson on 1/05/2008.

In the claims, please amend the claims per the attached PDF from applicant

Allowable Subject Matter

2. Claims 1, 4, 7-8, 12-14, 16-17, 19, 21-24, 37-41 are allowed.
3. The following is an examiner's statement of reasons for allowance

Claims 1 and 19

The closest prior art of Clapper (6822698) teaches the display of a remote control on an interface where the remote control is shown in the perspective view. Clapper shows the user can interact with the remote control and as the user selects a button the remote on the display reflects the user's selections. The displayed remote control on the interface displays a highlighted button to the user as they make a selection. However Clapper is not seen as teaching a feature where the button is also shown in a 3D perspective view where the button being pressed is displayed as being pressed in a 3D view on the remote control. Therefore, the prior art is not seen as teachings all the features of the claims.

The prior art of Jindal teaches a remote control that is displayed on the interface and when the user selects a button on the physical remote control the display reflects the coordinates of the selection to the user. The prior art of Jindal shows a remote control in a 3D view. Jindal is not seen as teaching a feature where the button is also shown in a 3D perspective view where the button being pressed is displayed as being pressed in a 3D view on the remote control. Therefore, the prior art is not seen as teachings all the features of the claims.

Art Unit: 2179

The prior art of Kolde teaches a remote control that also physically displays the remote to the user. Kolde teaches the user selects a button on the interface and an animation is shown reflecting the user's choice. The animation is not shown on the remote but is shown as a button superimposed over the content on the screen. Kolde is not seen as teaching a feature where the button is also shown in a 3D perspective view on the remote where the button being pressed is displayed as being pressed in a 3D view on the remote control. Therefore, the prior art is not seen as teachings all the features of the claims.

Therefore, the claims are allowed over the prior art specifically in light of the amended feature of updating the 3D representation of the remote by displaying a 3D perspective view of the button being depressed on the 3D representation of the physical remote control.

Claims, 4, 7-8, 12-14, 16-17, , 21-24, 37-41

These claims are dependent upon Claims 1 and 19 and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven B. Theriault whose telephone number is (571) 272-5867. The examiner can normally be reached on M-F 7:30 - 4:00 PM.
